PRELIMINARY NOTES

ATTENTION

It is forbidden by law to activate EPLUS speed unlocker in public places such as streets, squares and cycling paths. So it is only possible to activate EPLUS Speed Unlocker in private places such as circuits and private properties. The maker denies responsibility due to any damage to pedal assisted bicycles where Eplus is set up. The maker denies responsibility due to any harm to people or objects.

MINIMUM REQUIREMENTS

- Windows 10.
- Not compatible with Apple computers.
- Be equipped with the appropriate connection to connect the engine to the PC.
- Have an Internet connection.

BIKECOIN (CREDITS)

The system works with bikecoin. Once the upgrade is made, the system subtracts from the totalizer (money box) a share of bikecoin.

For each modified bike, the software stores the engine number. Subsequent upgrades of the same type will always be free if you go to the same dealer.

For changes of a higher type an additional fee of bikecoin will be required.

SOFTWARE USE

1

Make sure your internet connection is active.
Download and start the Eplus Flash software.

LINKS FOR DOWNLOAD:

<http://eplus.artware.it/transfer/EPlusFlashSetup.exe>

Enter the username and password communicated by Eplus.

Continue then making the choice:

- Shimano Steps E 8000
- Shimano Steps E 7000
- Shimano Steps E 6100
- Shimano Steps E 6001
- Shimano Steps E 6002
 - Fazua
 - Giant
 - Brose

If a manual setting of the communication ports is necessary, enter the PC control panel, select Device Management and locate the COM (picture 3) port for the Shimano device. Pay attention: the COM port may change from time to time.

Enter the data in the Eplus Flash program in the upper left menu, then press apply.

HOW TO PROCEED BY ENGINE

Once the Eplus Flash software has been installed, the manuals available on the Eplus website must be followed for each engine.

Or continue by clicking below on the corresponding engine link:

> **SHIMANO**

> **FAZUA**

> **GIANT**

> **BROSE**
